

Birds of Iberia

The book examines 150 bird species of special interest and the main areas where they can be found. The descriptions give an indication of the status of each species within Iberia and of their more global context. Other bird species which have been recorded in Iberia are also listed and their status summarized. This is a major reference work for those planning to watch birds on the Iberian Peninsula. The book is an appreciation of the extraordinarily rich and varied birdlife of Iberia and a plea for conservation of both species and landscape.
