

E Issues in Agribusiness: The What, Why and How

This book looks into the what is electronically-enabled agribusiness? Why would an agribusiness want to embrace it? And how does one go about doing it? The book pulls together a number of major issues facing people moving into the electronically enabled agribusiness environment. This book is both an introduction to electronic business issues and a comprehensive guide to more detailed business processes and strategic planning matters associated with the technologies involved. In particular the following key areas are addressed, concepts, technology in business, e-enabled business models and e-strategies, management concepts and innovative education.
