

Luminous Waves 2017

Little known to most, there is a very special display of beauty that happens at sunrise and sunset. The golden light illuminates waves as they rise and crash onto the shore. The waves glow in radiant colors as the light filters through the translucent water, creating a kaleidoscope of patterns and sparkling jewels. This beautiful moment lasts barely a second before the wave breaks and only a special camera and photographer committed to finding this beauty can bring it to you. We present this luminous beauty to you, our fellow lovers of light and water in motion.
