

Rich Mind Rich Man

Coert Coetzee is a successful property investor and has presented hundreds of seminars in various countries, teaching his unique property investment methods. When meeting his students again years later, he is often astounded at the vastly different results they achieve. Some use the information to build spectacular wealth, while others do absolutely nothing with it. The question arises why people who receive exactly the same message, respond to it so differently. After years of research and discussions with thousands of his students, Coetzee has concluded that one's mindset plays a very important role like sowing seed in prepared versus unprepared soil. In this book, he first gives the reader step-by-step instructions in programming the mind for lasting success, then he takes the reader through the principles of his popular and unique investment methods. These methods have already created more millionaires than all other methods put together. Coetzee firmly believes that creating lasting wealth is a holistic process and his motto is: A poor man with a rich mind is richer than a rich man with a poor mind, but nobody is richer than a rich man with a rich mind.
