

## Scary Harry Helps with Infant Binge Drinking

In this book Scary Harry confronts your baby as he exposes their darkest secret: binge drinking. While parents overlook the obvious signs of a drinking problem with their infant, Harry knows better. Does YOUR baby have any of these symptoms? Constant peeing Inability to recite the entire alphabet, in order, without singing it Slurred or difficult to understand speech Difficulty tracking objects with their eyes Stumbling or falling while walking Frequent vomiting Always drinking from the bottle If you answered yes to any of the above, your baby could be an alcoholic. No need to worry, just read this book and let Scary Harry give your baby a reason to never touch another drop of alcohol.
