

Why Good Kids Turn into Deadly Terrorists: Deconstructing the Accused Boston Marathon Bombers and Others Like Them

Using psychological theory and the authors direct experience working with at-risk youth, this book answers the questions on the minds of anyone shocked and appalled by the events of the Boston Marathon bombings. Identifies the various factors and influences that drove two young men who were described by many who knew them to be nice, normal people to commit premeditated acts of violence Addresses recent events in other countries with similarly aged and seemingly unthreatening young adults and teens as perpetrators of attacks Provides an appendix containing sources for further research, including books, news articles, links to journal articles, and websites of research organizations Includes a foreword by Michael Lamport Commons, PhD, Harvard Medical School
