

## Palliative Day Care

There has been a steady growth in the provision of day care services for people with life-threatening illnesses who live at home. This book includes details of the range of therapies and services that a multi-disciplinary team can provide to address the physical, emotional, psycho-social and spiritual needs of these patients and their families, thus enabling them to remain in their own homes. The book covers every aspect relating to the planning of the palliative day care centre, individual chapters being written by specialists in the various fields.
